- Fleet Refuelling Stations
- Home/Fleet vehicle Refuelling Appliances
- Installation of aftermarket CNG conversions
- Supply of conversion kits and storage cylinders
- Consultancy and Advisory Services:
Compressed Natural Gas (CNG), Liquefied Natural Gas (LNG) and Bio Methane.
- Train, Licence and Franchise Retailers & Installers throughout USA.

ABOUT CNG

CNG is the most environmentally friendly, safest and most affordable fuel available. Pricing is inherently stable because it is not tied to fluctuating oil prices and Middle Eastern instability.

It is simply the clean, abundant fuel that is delivered to homes through the pipeline network.

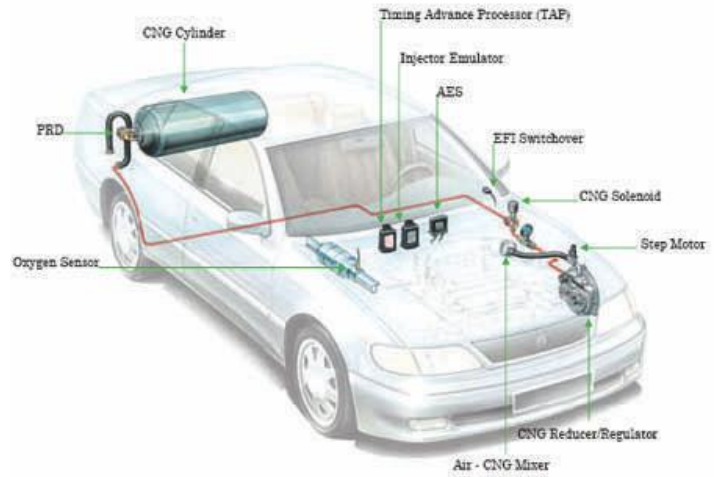

It is a 100% indigenous AMERICAN Fuel and there are enough reserves in American to last over 300 years.

CNG represents the fastest growing fuel market in the world. There were over 13 million CNG vehicles in the world in 2010, and this is expected to grow to 25 million by 2015 and 68 million in 2020. American is one of the last countries to adopt this amazing fuel.

CNG is the CLEANEST Fuel with a carbon footprint 25% less than gasoline and 50% less than coal fired electric and hybrid cars.

It is the MOST AFFORDABLE Fuel costing between 1-1.5 dollars per equivalent gallon of gasoline.

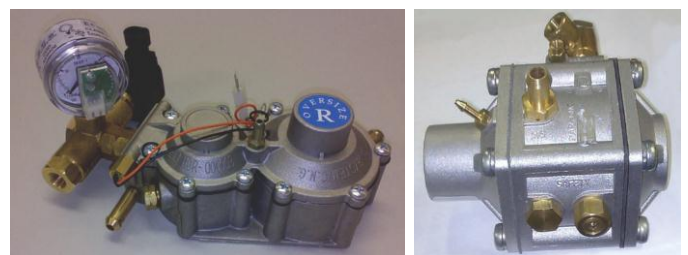

It is the SAFEST fuel with a narrow range of flammability limits and comes in explosion proof, fire proof, bullet proof and collision proof thick forged steel cylinders.
